AGENDA

13:00–14:00   Interactive Discussion

How to use GenAI to better respond to global crises in real-time

In a world facing escalating global crises like climate disasters, wars and healthcare emergencies, Marty Sprinzen, CEO of Vantiq, demonstrates how intelligent, real-time systems powered by Generative AI are revolutionizing disaster response, healthcare and public safety. From guiding responders during disasters such as the LA wildfires to enabling smart safety with 11,000 cameras at KAFD and transforming patient care in Mayo Clinic's ambulances, this session highlights how innovation can save lives, improve outcomes and drive global resilience.

14:00-14:30   Networking Break

14:30–15:30   Healthcare Panel

From Swiss peaks to health leaps — Where AI can take healthcare

Dr. Ryan Vega, Chief Health Officer at Vantiq, addresses today's critical healthcare challenges, from rising costs to overwhelmed systems. By leveraging Generative AI for proactive care and real-time decision-making, this session explores how to enhance resilience, improve outcomes and save lives—ensuring healthcare adapts to the demands of an increasingly complex world.

15:30-16:00   Networking Break

16:00–17:00   Defense and Public Safety Panel

Tackling global security challenges with GenAI

Nick Bray, CBE, Global VP of Defense and Security and former head of UK MOD's international strategy and operations and RAF Commanding General in Afghanistan, brings decades of military leadership to tackling today's most pressing defense and security issues. He combines his military experience with 8 years in cutting-edge technologies in civilian life. Drawing on realworld challenges, he discusses how Generative AI and adaptive strategies are transforming disaster response, safeguarding critical infrastructure and shaping a safer, more secure world.

17:00–17:30   Fireside Chat

17:30–19:00 Sunset Champagne Reception

DELEGATES

Marty Sprinzen
CEO of Vantiq

Visionary leader of Vantiq, addressing global challenges in healthcare, defense and public safety. Founder of Forte, once the fastest-growing software company. Named a Top 50 Software CEO in 2025.

Dr. Ryan Vega
Chief Health Officer

Healthcare pioneer who led healthcare innovation at the Veterans Affairs advancing global software and health systems with real-time operational intelligence and AI. Winner of the prestigious 2025 BIG Innovation Award.

Nick Bray, CBE
Global VP of Defense and Security

Former head of UK MOD international planning, Commanding General in Afghanistan, and RAF cyber security lead, leveraging decades of military experience to innovate defense and security technologies.

PANELISTS

Mark Messow
Chairman at Sports Advantage AG and Technology Advisory at Techipartners GmbH

Mark brings decades of experience in digital transformation and IoT from previous roles at ABB, Corning Switzerland Gmbh, Dassault Systèmes and Celestica.

### Adel Elmessiry PhD
President & CTO of ALPHAFIN

With a PhD in artificial intelligence and decades of work as an entrepreneur and executive in healthcare technology, Adel is an industry leader in specializing how AI and Blockchain can foster innovation for societal good.

Amir Banifatemi
**Chief Responsible AI Officer at Cognizant**

Amir is a technology and innovation strategist, entrepreneur, and investor known for his work in artificial intelligence, deep technology, and impact-driven initiatives, and for spearheading the AI for Good movement.

Will Semmes
Managing Director of Defense at Warriner Group

Former platoon commander in the US Marines, Will has spent a career navigating how technology can support defense and government programs including serving as Chief Deputy Director of the California Department of General Services and Director of California Performance Review under Governor Schwarzenegger

Daniel Seidel
Co-Founder and Co-CEO of LiveEO

As a Space Technologies Entrepreneur and host of "NewSpaceVision" podcast, Daniel is an industry leader of how AI and earth observation data can drive societal and economic impact.

Martyn Dove
RAF Veteran and Director at C4i Systems

Highly experienced Leader/Manager within IT, CIS, Cyber Security and Programme/Project Management spanning a 36 year career in the Royal Air Force. Outstanding Management Consultancy Experience able to identify key improvement initiatives and Change Management processes.

Dinakar Munagal
Co-Founder and CEO of Blaize

Dinakar brings more than 23 years of experience successfully leading global teams building graphics chips and has been recognized for technical excellence, new initiatives, and a results-focused approach.
